SUBJECT: Approval of Critical Teacher Shortage Areas for 2013-14

PROPOSED BOARD ACTION

For Approval

AUTHORITY FOR STATE BOARD ACTION

Section 1012.07, Florida Statutes, and Rule 6A-20.0131(2), F.A.C.

EXECUTIVE SUMMARY

Florida Statutes require the State Board of Education to approve areas of critical teacher shortage. State Board Rule requires the Commissioner to recommend specific projected public school teacher shortage areas for the next academic year. This report identifies which certification areas are facing an unmet need of certified teachers using current data on teacher supply and demand.

Each fall the Department of Education surveys school districts to determine the number of teaching positions filled that fall, the number of vacancies, and the number of courses being taught by inappropriately certified teachers. In addition, teacher preparation programs provide the number of new completers and their certification area. The survey results and information from teacher preparation programs provide four indicators of certification areas currently facing critical shortages. The Department ranks each indicator and then averages them all four across all types of shortage data to provide a final ranking.

Based on these indicators, the Commissioner recommends that the State Board approve the identification of the following fields as critical shortage areas for 2013-2014:

- English for Speakers of Other Languages (ESOL)
- Middle and High School Science
- Foreign Languages
- English/Language Arts
- Middle and High School Reading
- Exceptional Education
- Middle and High School Math

Supporting Documentation Included: Critical Teacher Shortage Areas for 2013-14 and Rule 6A-20.0131, Critical Teacher Shortages

Identification of Critical Teacher Shortage Areas

Recommended Shortage Areas

This report identifies which certification areas are facing an unmet need of certified teachers using current data on teacher supply and demand. Using the information provided below, the recommended critical teacher shortage areas for the 2013-14 school year are as follows:

- English/Language Arts
- Reading
- Exceptional Education
- Science
- Foreign Languages
- English for Speakers of Other Languages (ESOL)
- Mathematics

The shortage areas above represent certification types where substantial proportions of teachers are being hired to teach courses without the appropriate certification, where significant vacancies exist, or where postsecondary institutions do not produce enough graduates to meet the needs. This information can be used to determine the current and projected needs of classroom teachers for specific subject areas in the upcoming school year. The information used to determine these shortage areas is presented below.

Background

Section 1012.07, Florida Statutes, requires the State Board of Education to annually identify critical teacher shortage areas based on the recommendations of the Commissioner of Education. This list of shortage areas is used to identify high-need content areas and high-priority location areas using the following information:

1. The number and percentage of positions in each discipline filled by teachers not certified in the appropriate field;
2. The annual supply of graduates of state approved Florida teacher education programs for each discipline;
3. The number and percentage of vacant positions in each teaching discipline; and
4. Critical teacher shortage areas which may be identified pursuant to rules adopted by district school boards. These areas shall be identified based on consideration of at least the information specified in items 1 through 3 above and submitted to the Department no later than June 1st of each year.

In the 2011 legislative session, Senate Bill 736, the Student Success Act was passed to reform employment, compensation, and evaluation practices for educational personnel and school administrators in Florida's public schools. As part of this legislation, section 1012.07, F.S. was amended to provide further clarity on determining and identifying critical teacher shortage areas. Additionally, section 1012.22, F.S. was amended to include critical teacher shortage areas for consideration by school districts when determining and adopting a salary schedule or salary schedules as the basis for paying all school employees hired before July 1, 2014.

Calculating Shortage Areas

The critical teacher shortage areas for 2013-14 are calculated using information provided in Exhibits 3 through 5 below. The Department ranked the information in each of the exhibits to create Exhibit 1.¹ Rankings are then averaged across all types of shortage data. This method provides the ability to compare different types of data that show many aspects of teacher supply and demand.

In Exhibit 1 below the bolded subject fields indicate the recommended 2012-13 Critical Teacher Shortage areas. The final column, “Final Rank” of Exhibit 1 shows that English/Language Arts is ranked as having the highest critical teacher shortage, followed by Reading, Exceptional Education, Science, Foreign Languages, Mathematics and English for Speakers of Other Languages. The final rank column excludes Elementary Education, Physical Education, and Social Studies because further analyses showed a surplus of teachers in these fields. Additionally art was excluded from the final rankings because the deficit of teachers was under 10.

Exhibit 1 – Summary of Critical Teacher Shortage Rankings for 2013-14.

Subject Fields	Teacher Vacancies	Teachers Hired Out-of-Field	Teacher Supply	Average Rank	Rank	Final Rank
English/Language Arts	6	3	11	6.67	1	1
Reading	5	2	14	7.00	2	2
Exceptional Education	2	4	15	7.00	3	3
Science	3	13	8	8.00	4	4
Elementary Education	1	8	16	8.33	5	N/A
Foreign Languages	8	15	4	9.00	6	5
Physical Education	11	12	7	10.00	7	N/A
Social Studies	7	10	13	10.00	7	N/A
Mathematics	4	16	10	10.33	8	6
Art	12	14	6	10.67	9	N/A
English for Speakers of Other Languages (ESOL)	10	17	N/A	13.50	10	7

Note: Subject Fields that were missing data in one or more of the shortages examined were excluded from the exhibit (with the exception of ESOL which was missing supply data because it is considered an endorsement, not an education program).

Information on Shortage Areas

Data on teachers currently in the workforce and their certification fields are presented below to provide context for the recommended critical teacher shortage areas. This information covers the content areas in which the majority of teachers are currently certified, the content areas in which teachers are being hired, and the proportion of new hires that are not appropriately certified. Additional information is provided on projected teacher vacancies and recent completers of teacher education programs in Florida. The following exhibits provide information on teacher supply and demand:

- Exhibit 2 - Total Number of Teachers by Certification Area during 2011-12
- Exhibit 3 - Total Number of Newly Hired Teachers by Certification Area during 2011-12
- Exhibit 4 - Total Number of Current and Projected Vacancies by Certification Area for 2013-14
- Exhibit 5 - Number of Students Completing Teacher Education Programs during 2010-11
- Exhibit 6 - High Priority School Locations and Teachers Teaching In-field and Out-of-field

¹ The rankings order the data with one being the subject area that shows the most need for additional teachers. For example, when looking at Exhibit 5 the subject area with the fewest teachers produced would be ranked as number 1, but for Exhibit 4 the subject area with the most vacancies would be ranked as number 1.

The top teacher certification area for the 2011-12 school year was by far, Elementary Education, with 46.3% of teachers receiving certifications. Exhibit 2 provides the total number of teachers by their primary certification area for the top certification areas, as reported by school districts for the 2011-12 school year. Shortage areas for 2013-14 are bolded in the exhibit below. Following Elementary Education, the numbers drop off sharply with English/Language Arts making up 7.3% of certifications, English for Speakers of Other Languages (ESOL) at 5.8% and Mathematics making up 5.6% of certifications. As shown in Exhibit 2, the seven recommended critical teacher shortage areas are among the top content areas based on the number of teachers certified and account for about 30% of all certified teachers (n= 167,322).

Exhibit 2 - Total Number of Teachers by Certification Area - Top Areas for 2011-12.

Note: Bolded subject fields indicate 2013-14 Critical Teacher Shortages.

In the 2011-12 school year, several of the certification areas that contained higher percentages of new hires not appropriately certified were also among the critical teacher shortage areas identified for 2013-14. Exhibit 3 provides the total number of new hires and the proportion of these new hires that were not appropriately certified, as reported by school districts for the 2011-12 school year. This information provides detail on the types of teachers that are currently in demand across all school districts and the proportions that are not appropriately certified when hired. Data on newly hired teachers highlight the teacher supply and demand issues districts face when attempting to fill positions with appropriately certified teachers. Districts prefer to hire appropriately certified teachers, so in areas such as Reading, English/Language Arts, and Exceptional Student Education where more than 10% of teachers were hired without the appropriate certification, the data indicates a likelihood that a shortage of appropriately qualified teachers exists.

Note: Bolded subject fields indicate 2013-14 Critical Teacher Shortages.

The recommended critical teacher shortage areas for 2013-14 are among the highest projected vacancies and the highest number of current vacancies for 2012-13 (and most are within the top 10 vacancies). Exhibit 4 provides the total number of current vacancies for the 2012-13 school year and the total number of projected vacancies for the 2012-13 school year by certification area. This information is typically used to plan recruitment efforts, including The Great Florida Teach In held annually in June. This highlights the anticipated subject areas of teacher demand seen across all school districts.

In 2010-11, there were fewer completers of Foreign Languages, Science and Mathematics programs, compared to English/Language Arts, Reading, and Exceptional Student Education programs. Exhibit 5 presents the most recent information on new completers from teacher education programs across Florida. For subjects such as physics and chemistry, these programs are aggregated into one subject area, science.

Low performing and low-economic urban schools have a higher proportion of courses taught by teachers without the appropriate certification. Schools receiving a grade of “F” experience the largest proportion of out-of-field teachers. This information provides the context of high-need schools experiencing higher amounts of teachers not certified in the appropriate field for which they teach. The complete list of high priority school locations be found in Appendix A and Appendix B attached.

A larger percentage of teachers are teaching out-of-field in the high priority school locations compared to the statewide average of teachers teaching out-of-field. For example, 4.6% percent of teachers are teaching out-of-field across the state, compared to 7.2% in D Schools, 7.3% in F Schools, 6.1% in Urban/Low-Economic Schools, and 4.8% in rural/Low-Economic Schools. Exhibit 6 provides information on the number of high priority school locations and the proportion of courses at those locations being taught by in-field and out-of-field teachers. Consistent with Florida Statute we have identified high-priority locations as high-density, low-economic urban schools, low-density, low-economic rural schools, and schools that earn a grade of “F” or three consecutive grades of “D”. The schools in need of intervention and support, per Florida Statute 1008.33, consist of schools that earn a “D” or “F.” Low-economic schools are those that have 75 percent or more students who receive free or reduced lunch.

6A-20.0131 Critical Teacher Shortages.

(1) On or before January 31 of each year, the Commissioner shall recommend to the State Board for approval the specific teaching areas and high priority locations in which critical teacher shortages are projected for the public schools during the year following the academic year in which approval is made.

(2) In accordance with procedures approved by the Commissioner, a list of critical teacher shortage areas shall be prepared based on consideration of current supply and demand information, vacancy information in each teaching discipline, and emerging educational requirements. In addition, data related to Florida public school instructional personnel shall include but not be limited to:

(a) The number and percentage of positions in each discipline filled by teachers not certified in the appropriate field;

(b) The annual supply of graduates of state approved Florida teacher education programs for each discipline; and

(c) Critical teacher shortage areas which may be identified pursuant to rules adopted by district school boards. Such areas shall be identified based on consideration of at least the information specified in paragraphs (2)(a) and (b) of this rule and shall be submitted to the Department no later than June 1 of each year.

(3) Based on data submitted annually by each school district, the Commissioner shall rank all public schools in accordance with the criteria provided in Section 1012.07, Florida Statutes, and shall select from this ranked list those schools to be identified as high priority locations.

(4) Based on the recommendations of the Commissioner, the State Board shall adopt a list of approved critical teacher shortage areas and high priority locations.
